DELIVERY MODE

01/24/2008

PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

**Office Action Summary**

Application No.

10/693,807

Applicant(s)

SYLVAIN, DANY

Examiner

El Hadji M. Sall

Art Unit

2157

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE \_\_\_\_\_ MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on 13 November 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-36 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-36 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_.
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_.

### **DETAILED ACTION**

1. This action is responsive to the correspondence field on November 13, 2007.

Claims 1-36 pending. Claims 1-36 represent rehomng via tunnel switching.

2. **Claim Rejections - 35 USC § 102**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-10, 12-21, 23, 25-28, 30 and 32-35, are rejected under 35

U.S.C. 102(e) as being unpatentable over Yu et al. U.S. 7237260.

Yu teaches the invention as claimed including method for dynamic selection for secure and firewall friendly communication protocols between multiple distributed modules (see abstract).

As to claims 1 and 12, Yu teaches a method and a tunnel access server for facilitating communications between a user element and a protected network resource comprising:

- a) establishing a first tunneling session with the user element via a first access network (column 1, lines 49-51);

- b) assigning to the user element a first target network protected address for addressing packets intended for the protected network resource and traveling in part over the first tunneling session (column 3, lines 52-57);

- c) establishing a second tunneling session with the user element via a second access network (column 1, 51-55); and

- d) reassigning to the user element the first target network protected address for addressing packets intended for the protected network resource and traveling in part over the second tunneling session (column 3, lines 52-57).

As to claims 23 and 30, Yu teaches a method and a user element for facilitating communications between a user element and a protected network resource comprising:

- a) establishing a first tunneling session with a tunnel access server via a first access network (column 1, lines 49-51);

b) sending packets intended for the protected network resource over the first tunneling session using a first target network protected address (column 3, lines 52-57);

c) establishing a second tunneling session with the tunnel access server via a second access network (column 1, 51-55);

d) receiving from the tunnel access server a target network protected address for sending packets intended for the protected network resource (column 1, lines 52-54; column 3, lines 52-57);

e) determining if the target network address is the same as the first target network address (column 5, lines 24-29); and

f) if the target network address is the same as the first target network address, sending the packets intended for the protected network resource over the second tunneling session using the first target network protected address (column 5, lines 29-35).

As to claims 2 and 13, Yu teaches the method and the tunnel access server of claims 1 and 12 wherein the first and second tunneling sessions are encrypted tunneling sessions (figure 4A).

As to claims 3 and 14, Yu teaches the method and the tunnel access server of claims 1 and 12 further comprising authenticating the first and second tunneling sessions with common authentication indicia (figure 4).

As to claims 4, 5, 15 and 16, Yu teaches the method and the tunnel access server of claims 1, 4, 12 and 15, respectively, wherein the first target network protected address is reassigned to the user element only when the second tunneling session is established within a predetermined period of time from termination or last use of the first tunneling session, and further comprising assigning to the user element a second target network protected address for addressing packets intended for the protected network resource and traveling in part over the second tunneling session when the second tunneling session is not established with the predetermined period of time (column 3, lines 39-63).

As to claims 6 and 17, Yu teaches the method and the tunnel access server of claims 1 and 12 further comprising terminating the first tunneling session and reserving the first target protected network address for the user element for a predetermined period of time for use in association with the second tunneling session (column 4, lines 21-23).

As to claims 7, 18, 25, 26, 32 and 33, Yu teaches the method, the tunnel access server and the user element of claims 1, 12, 23, 23, 30 and 30, respectively, further comprising:

- a) receiving a request from the user element for a second tunneling session (column 1, lines 52-54);
- b) terminating the first tunneling session (column 4, lines 21-23).; and

c) enabling the second tunneling session (column 4, lines 29-33).

As to claims 8 and 19, Yu teaches the method and the tunnel access server of claims 1 and 12 further comprising receiving the packets from the user element and forwarding the packets to the protected network resource using the first target network protected address (column 2, lines 61-64).

As to claims 9, 20, 27 and 34, Yu teaches the method, the tunnel access server and the user element of claims 1, 12, 26 and 30, respectively, further comprising:

a) receiving authentication indicia from the user element; and b) authenticating use of the second tunneling session by the user element based on the authentication indicia (column 4, lines 15-33).

As to claims 10, 21, 28 and 35, Yu teaches the method and the tunnel access server of claims 1, 12, 23 and 30 wherein the first and second access networks facilitate communications with the user element using different communication technologies (column 4, lines 61-63).

**4.**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains.

Patentability shall not be negated by the manner in which the invention was made.

5. Claims 11, 22, 24, 29 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yu et al. U.S. 7237260 in view of Bahl et al., 7,020,464.

Yu teaches the invention substantially as claimed including method for dynamic selection for secure and firewall friendly communication protocols between multiple distributed modules (see abstract).

As to claims 11, 22, 29 and 36, Yu teaches the method, the tunnel access server and the user element of claims 10, 21, 28 and 35.

Yu fails to teach wherein at least one of the different communication technologies is a wireless communication technology.

However, Bahl teaches system and method for providing agent-free and no-packet overhead mobility support with transparent session continuity for mobility devices. Bahl teaches a wireless communication technology (column 5, lines 16-43).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine Yu in view of Bahl to provide wherein at least one of the different communication technologies is a wireless communication technology. One would be motivated to do so to allow the devices to be mobile (column 1, line 23).

As to claims 24 and 31, Yu teaches the method and the user element of claims 23 and 30 wherein if the target network address is different than the first target network protected address, further comprising:

b) sending the packets intended for the protected network resource over the second tunneling session using the target network protected address (column 1, lines 59-63).

Yu fails to teach explicitly a) restarting applications communicating with the protected network resource.

However, Bahl teaches a) restarting applications communicating with the protected network resource (column 1, lines 44-48).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine Yu in view of Bahl to provide a) restarting applications communicating with the protected network resource. One would be motivated to do so to allow saving the new changes.

**6. Response to Arguments**

Applicant's arguments filed 11/13/07 have been fully considered but they are not persuasive.

Applicant argues that he conceived of the present invention prior to the filing date of Yu, and constructively reduced the present invention to practice through the filing of the present application.

In regards to the point (A), Examiner respectfully disagrees.

Applicant has not shown enough evidence to demonstrate conception of the present invention prior to the filing date of Yu, and reduction to practice. In Appendix C, there are more than two months gap between June 5, 2003 and August 21, 2003. What has occurred during this period. Appendix C shows sufficient evidence regarding inactivities. In Appendix A, the mapping of the claims is not provided. Appendix A does not show enough evidence to demonstrate conception of the present invention, and sufficient reduction to practice is not provided.

**7. Conclusion**

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Examiner has cited particular columns and line numbers in the references applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the Examiner. In the case of amending the claimed invention, Applicant is respectfully requested to indicate the portion(s) of the specification which dictate(s) the structure relied on for proper interpretation and also to verify and ascertain the metes and bounds of the claimed invention.

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to El Hadji M Sall whose telephone number is 571-272-4010. The examiner can normally be reached on 8:00-4:30.

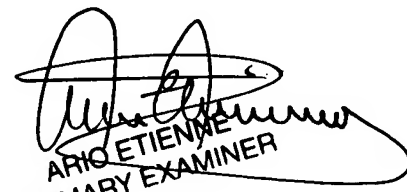

Application/Control Number:
